ABOUT US

Emosense is an innovative emergent in the field of Emotions Detection and Recognition Market by Technology through Artificial Intelligence ready to face the challenges of the EDR market and deliver an edge to the businesses.

Our job is to help various organisations understand the need to comprehend emotional intelligence so they eventually have a better understanding of the nature of their audiences.

FEATURES

- Captures images and videos and extracts any kind of auditory and visual data from it.
- Processes and detects atleast one subject of interest from the data and provides accurate feedback based on the emotions displayed by the subject,
- Auditory data is processed using Support Vector Machine and deep belief network.
- Visual data is processed using facemesh, combined with convolutional neural network.
